What the room was really talking about

WEEK 47 · 16 NOV 2026
16–22 Nov 2026
Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY — 5/10 · same as last week

Previously: the OTC deal for ex-RDX XRD executed, volunteers rebuilt the wallet price service in 48 hours, and a core pool-rounding flaw plus the missing supply-cap enforcement kept everyone asking who maintains the Engi

A security-flavoured week: a vulnerable Android wallet version was fixed fast after GENKIPOOL responsibly disclosed the flaw, and the same builder shipped a promising community test of a new wallet-to-dApp connection. Meanwhile the room got practical about spam, coordination and the ever-tricky question of how to actually get money onto Radix.

WHAT THE ROOM TALKED ABOUT

Android wallet security update

Version 1.22.3 fixes a vulnerability affecting locally stored seed phrases in some wallets (versions 1.18.7–1.22.2). Installing the update isn't enough — affected users must also complete the 'Update protection' step after checking their seed phrase is written down.

driven by GENKIPOOL

Anti-spam bot for main chat

Mr. Peanutbutter proposed reviving a bot requiring ownership of a Radix wallet before posting; lex offered to build one that blocks spam patterns. Jonas (Delphibets) warned it could lock out genuine newcomers doing research.

Getting funds onto Radix

With Rocket X routes offline, members walked newcomers through buying eXRD on Ethereum or Base and bridging via Hyperlane or Astrolescent — or swapping SUI to USDC first. A few hiccups, like hUSDC swaps failing on Astrolescent, got community troubleshooting.

Price talk moderation in MAIN

Markus floated returning to a 'no price talk' rule because price chatter drowns out other conversations, but said he won't enforce anything until the community reaches consensus.

THE BOTTOM LINE

REMEMBER THIS

Update your Android Radix Wallet to 1.22.3 and complete the 'Update protection' step — the seed-phrase flaw was disclosed responsibly and fixed fast.

NEXT WEEK

Watch for: tester feedback on GENKIPOOL's iroh build, the iroh anti-spam bot taking shape, and who takes ownership of the Engine patch.

More from the room

The week had more conversations than one page could hold.

THE CONVERSATIONS, CONTINUED

rly.fun relaunches with fixes

lex announced rly.fun is back at rlyfun.com with bug fixes, faster loading, repaired image links and an improved leaderboard, and floated adjusting the graduation amount.

ECB tokenization test could suit Radix

BassPhil shared that the European Central Bank is seeking partners to test tokenized bank deposits and securities; RoterHund said an ECB contact on their wholesale DLT track is 'all ears' for scalable solutions — prompting playful calls for fox to present.

ALSO THIS WEEK

- Governance: the Permanent RAC ballot vote opened and Giles Morris withdrew his candidacy — see Radix DAO Weekly.
- Kadafi's 'RADIX FAM' payout pitch drew pushback from XRD82 and Danner Fall over transparency.
- Dustin Henderson pressed on pending DAO asset transfers; foxylady said they come after the DAO is fully established.
- HOLy_HEAERN asked the forum for a manifest to withdraw XRD stuck in Root Finance while its frontend is down.
- Blind5ight called for a coordination webpage of what the ecosystem needs; Leo pointed to radix.wiki/ideas.
- Vlad B dampened plans to enter a global awareness event, citing the four institutional partners needed in weeks.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

QUESTION OF THE WEEK

> **“How can someone in Europe buy XRD now that Alchemy Pay no longer works?”**
>
> Buy eXRD on Uniswap (Base chain), then bridge it to native XRD in the Radix Wallet via the Hyperlane Nexus bridge; Astrolescent is another route.

DEBATE OF THE WEEK — ALLOW PRICE TALK IN MAIN?

ONE SIDE

Markus: restore the no-price-talk rule so real conversations aren’t drowned out.

THE OTHER

lex, Ward $WOWO and Kadafi: keep moderation minimal — price talk is legitimate and no more off-topic than other chat.

Still open — expect a rematch.

FROM THE NEWS ROOM

Urgent Android wallet update

Version 1.22.3 fixes a seed-phrase vulnerability in versions 1.18.7–1.22.2, responsibly disclosed by GENKIPOOL. Update via Google Play and complete 'Update protection'.

Radix Connect over iroh

GENKIPOOL released a community test build adding iroh as a second wallet-to-dApp connection — detecting a closed wallet in about a second without the signaling server. Testers should use a new wallet on Stokenet.
