RADIX DLT · THE COMMUNITY CHAT, DISTILLED

Radix Weekly

What the room was really talking about

WEEK #13
3–9 Aug 2026
t.me/radix_dlt

COMMUNITY MOOD 6/10 · same as last week

Previously: the community marked Dan Hughes's first anniversary, Hyperscale ran eight browser nodes, two temperature checks advanced, and avaunt opened the x402/CAIP temperature check.

A week where governance sharpened its edges and AI-assisted building stole the show. The CAIP/x402 temperature check passed quorum, Daffy put a Constitution Proposal on a four-week clock, and Emily built a full escrow dApp on mainnet in three hours using AI. Meanwhile, the OTER team unveiled a bonded governance voting platform and the DAO treasury runway became a pressing conversation.

WHAT THE ROOM TALKED ABOUT

Constitution Proposal on a four-week clock

Daffy announced a Constitution Proposal requiring 10% quorum (~1.35 billion XRD) and a 66% YES threshold, using a new DAO-dedicated Consultation App improved by Timan. Holders with treasury locked in multisigs were urged to plan ahead for participation.

driven by Daffy, Timan | Astrolescent

AI builds a Radix escrow in hours

xStelea.xrd shared Radix AI skills letting agents build and deploy dApps with minimal human input. MAvRe (Emily) demonstrated by building a full escrow service on mainnet in three hours, with AI deploying contracts autonomously.

driven by xStelea.xrd, MAvRe - Emily your Radix assiste

OTER unveils bonded governance voting

L introduced OTER XRD Governance, a DAO voting platform with a settlement layer using bonded on-chain claims, an independent open-source verifier, and staked-jury disputes. Release was targeted within the week.

driven by L, Nicolai | Sentura

DAO treasury runway questions surface

Giles Morris pushed for treasury transparency to prepare backup plans in case the DAO runway is negligible. Daffy agreed and proposed baking a 6-month operational budget grant into the DAO Activation Vote so the Permanent RAC doesn't start with a proposal.

driven by Giles Morris, Daffy

THE BOTTOM LINE

REMEMBER THIS

The Constitution Proposal is now on a four-week clock, and AI-assisted building proved a single developer can ship a mainnet dApp in an afternoon.

NEXT WEEK

Watch for: the OTER governance platform release and the Constitution Proposal launch within the next four weeks.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

COUNCIL & INSIDER WATCH

avaunt RAC

Announced the CAIP and x402 registration temperature check reached quorum and will submit the CAIP Namespaces PR as the first step.

Daffy COMMUNITY CONTRIBUTOR

Announced the Constitution Proposal within four weeks and proposed incorporating a 6-month operational budget into the DAO Activation Vote so the Permanent RAC starts without needing a governance proposal.

Gary ECOSYSTEM CONTRIBUTOR

Confirmed the 24B-to-18B max supply reduction was never implemented and that the repurposed stablecoin reserve XRD will be present at DAO transfer. Relayed that a native stablecoin is coming later this year with liquidity work underway.

MAvRe - Emily your Radix assiste COMMUNITY DEVELOPER

Demonstrated Trade Vault, a person-to-person escrow dApp built in three hours by AI using xStelea's Radix skills, with contracts deployed on mainnet autonomously.

"3 years ago this would have taken months to make."

QUESTION OF THE WEEK

"Has the max supply change from 24B to 18B XRD, which came with the stablecoin reserve repurpose, materialized?"

No, it was never implemented — it was only assumed the community would go that route later.

Around the ecosystem

What shipped and launched, and the week's best lines.

FROM THE NEWS ROOM

Radix Weekly Week #12 published

The digest recapped Hyperscale browser nodes, remembering Dan Hughes, and two temperature checks advancing to governance vote.

HYDRA teases HYDRATRACK tool

The HYDRA project announced an upcoming tool for tracking HYDRA engagement across social networks, described as coming soon.

HEARD IN THE ROOM

> *"Maybe there are only a few of us developing at Radix, maybe there are 10 of us, but with AI we can do the work of 50."*
>
> — GENKIPOOL

> *"We make the result something nobody has to take on faith."*
>
> — L

THE PULSE

The mood: Cautiously optimistic — governance is taking concrete shape and AI-assisted building energized developers, but anxiety over DAO treasury visibility tempers the mood.

Hyperscale-rs milestone update from Reddit.

JARGON, DECODED

Pruning — Removing old ledger data to save disk space on validators; Radix currently has none, so the ledger simply grows.

Bonded claim — A governance result staked on-chain with financial backing, making it independently verifiable and disputable by a staked jury.

Max supply — The maximum number of tokens that will ever exist for a cryptocurrency.
