RADIX DLT · THE COMMUNITY CHAT, DISTILLED

Radix Weekly

What the room was really talking about

WEEK #27
9–15 Nov 2026
t.me/radix_dlt

COMMUNITY MOOD · DAY BY DAY

5/10 · same as last week

Previously: the OTC deal for RDX Works' XRD was signed with transfers promised in days, RDX Works entered liquidation, and the permanent RAC election gathered candidates.

A whiplash week: the DAO was officially founded and the OTC funds landed, volunteers fixed the Wallet's broken price feed in 48 hours, and 15 candidates stepped up for the permanent council — then a long-dormant flaw in core pool blueprints was exploited, reminding everyone the handover isn't finished until the community holds the keys.

WHAT THE ROOM TALKED ABOUT

The OTC deal is done

Gary announced the community's purchase of RDX Works' XRD is fully executed, with roughly 1.4 billion XRD received at a community-monitored address. Celebrations mixed with relief that more drastic measures were avoided; Dave noted other addresses, including MEXC, still hold funds.

driven by Gary, WutruSan, Dave

Volunteers rescue the Wallet

When token prices went blank, LINUXX.xrd built a lightweight replacement price server in under 48 hours, with Daffy (aka Heimdallr), timan and Doelle_Doeck deploying it at prices.radixdao.org. Members walked each other through swapping the URL in Wallet settings.

driven by LINUXX.xrd, Daffy (aka Heimdallr), projectShift

Rounding flaw found in core

Jelthebest spotted suspicious transactions; Daffy confirmed a rounding bug in the Radix Engine's TwoResourcePool and MultiResourcePool blueprints, present since Babylon, exploitable on high-value low-decimal assets like wBTC. A patch and rebuild are needed — but the repository keys are still Foundation-held.

driven by Jelthebest, Daffy (aka Heimdallr), Bayesien | RADIX.wiki | CAPER.network

DAO founded, fifteen step up

foxylady announced the DAO is officially founded with funds transferred. Candidacies for the permanent RAC grew to 15 before nominations closed Friday; J W withdrew, and projectShift confirmed the November vote uses Majority Judgement, where voters must qualify every candidate or their ballot is null.

driven by foxylady, Mr. Peanutbutter, projectShift

THE BOTTOM LINE

REMEMBER THIS

The community now officially owns the DAO — and within the same week it both fixed the Wallet's price feed in 48 hours and discovered a core flaw it needs the repository keys to patch.

NEXT WEEK

Watch for: the RDX Works court hearing on 18 November, the permanent RAC vote opening in late November, and word on who will own and ship the Radix Engine pool patch.

More from the room

The week had more conversations than one page could hold.

THE CONVERSATIONS, CONTINUED

Gary backs validators and MEXC

Gary restored 22M XRD of liquidity to MEXC, calling the earlier withdrawal protection for market makers, and staked 25M XRD to Martin's Delphibets node after Martin explained node runners have paid costs out of pocket for over a year. LINUXX.xrd warned Weft and Psilobox validators look inactive.

driven by Gary, Martin | Delphibets.com, LINUXX.xrd

Foxy's build, not Dan's prototype

Confusion over whether Hyperscale was abandoned was settled: flightofthefox continues his independent Rust build with weekly calls, but migration talk is months off. foxylady explained Dan's 500k TPS demo was a Java feasibility test, while fox's version uses strict testing and formal verification in Lean.

driven by flightofthefox (hyperscale.rs), foxylady, GENKIPOOL

ALSO THIS WEEK

- Bayesien found nothing in the protocol enforces the XRD supply cap, and Dan Hughes's shortened emission period was never implemented — expected to be fixed for Xi'an.
- Kadafi proposed validators contribute 10–50% of fees to ecosystem development, launching two RADIX FAM validators dedicated to it; Jelthebest countered that the DAO should run its own validators inste
- Anthony pitched a low-cost marketing pilot targeting Australian university student guilds around Feb/March to attract genuine developers.
- William Morris and Giles Morris explained buying exrd on Ethereum and bridging it to XRD via Hyperlane for newcomers.
- Mr. Peanutbutter explained how RAC seats are filled, vacated and recalled under the new governance rules — special elections, recalls, for-cause removal and resignation.
- J W withdrew his permanent RAC candidacy after a failed business takeover, but may return if a seat opens later.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

COUNCIL & INSIDER WATCH

The council's week was dominated by the transition: projectShift confirmed the permanent RAC vote still happens in November and explained its Majority Judgement rules, while asking Andyssignal to gather what's needed to patch the flawed pool blueprints — which still sit behind Foundation-held repository keys.

flightofthefox (hyperscale.rs) HYPERSCALE BUILDER

Settled abandonment rumours (his build and weekly calls continue, migration is months away), called fixed-supply tokenomics overrated, warned against dropping CEX listings, and downplayed the pool flaw as avoidable.

"i would also suggest there's many more pressing matters in radix-land also like getting the DAO setup 😅"

projectShift RAC

Confirmed the November permanent-RAC vote and its Majority Judgement rules, called for a risk assessment of all pools built on the flawed blueprint, and praised the 48-hour price-service fix as community self-rule in action.

"This is great work chaps, fucking proud of you. And a great example of what it means "Community runs this now""

foxylady RAC

Announced the DAO is officially founded with funds transferred, and explained why fox's Rust implementation differs from Dan's Java research prototype.

"no bags left to dump, DAO is about to start, we gonna be the first L1 thats really in communities hands"

Gary COMMUNITY OTC BUYER

Confirmed the OTC deal executed with ~1.4B XRD landed at a community-monitored address, restored 22M XRD of MEXC liquidity, and staked 25M XRD to a struggling validator.

Daffy (aka Heimdallr) COMMUNITY MEMBER

Confirmed the rounding error lives in TwoResourcePool and MultiResourcePool in the Radix Engine itself, present since Babylon, and flagged that the real question is who will own and ship the patch.

"The rounding error is in TwoResourcePool and MultiResource Pool and has been there since Babs. In Radix Engine. Need a patch and a rebuild."

Jazzer | DefiPlaza.net DEFIPLAZA

Explained why native pool LP tokens matter: the Wallet can display them without a website login, and holders keep access to their liquidity even if the dApp dies.

QUESTION OF THE WEEK

"Why does fox's Hyperscale implementation differ from the Foundation's 500k+ TPS prototype?"

Dan's was a Java research network meant only to prove linear sharding feasible, with unsolved issues like message overhead; fox started clean in Rust with strict testing and formal verification in Lean, incorporating all lessons learnt.

ASKED BY GOLDBYTE · ANSWERED BY FOXYLADY

DEBATE OF THE WEEK — HOW SERIOUS IS THE POOL FLAW?

ONE SIDE

flightofthefox and Azel: it's economically marginal — devs can simply stop using the component, and small-scale exploits pay less than honest bounties.

THE OTHER

Jelthebest and projectShift: the flaw sits in core Radix Engine blueprints used by most DEXs, and confidence suffers until it's patched and affected pools are assessed and redeployed.

Still open — expect a rematch.

Around the ecosystem

What shipped and launched, and the week's best lines.

FROM THE NEWS ROOM

Community fixes Wallet price service

Volunteers rebuilt the dead price feed in under 48 hours: linuxx_xrd wrote a lighter version, with djtrebel and Doelle_Doeck putting it into production.

t.me/radix_dlt/1011881

Gate reopens XRD deposits

The Gate exchange will reopen XRD deposits on 30 November, per the ecosystem news announcement.

x.com/radixeco/status/2121516784696381883

FROM THE DEV ROOM

The dev angle of the week was the pool blueprint flaw itself: a rounding error in core Radix Engine components since Babylon, needing a patch and rebuild once the repositories leave Foundation control. Meanwhile Vlad B reported that AI coding agents handle Scrypto well — "Radix works like butter...

HEARD IN THE ROOM

> *"Cassandra (Hyperscale 1.0) died with Dan, and Fox has picked up the torch and is carrying it forward (Hyperscale 2.0)"*
>
> — MARKUS

> *"Truly exciting times with 15 confirmed candidates for the PRAC! Thank you all for putting yourselves forward. The community take over is becoming a reality."*
>
> — XRD82

> *"Radix works like butter with agentic coding."*
>
> — VLAD B • IDEOMAKER.COM • FOTON.IS • RADI

> *"First time in a long while I'm feeling optimistic about Radix's future and potential"*
>
> — XRD82

THE PULSE

The mood: A week that swung from celebration to sober reality: the DAO exists and volunteers fixed real problems in days, but a core engine flaw the community can't yet patch took the shine off.

Written by AI from the public community Telegram chat — may contain mistakes. Never financial advice.

KEEPING SCORE

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

CAME TRUE

OTC transfers conclude within days

Gary confirmed the deal fully executed; ~1.4B XRD landed at a community-monitored address.

CAME TRUE

Elected DAO within about three weeks

foxylady announced the DAO is officially founded with funds transferred on 12 November.

PENDING

RDXW liquidation details in two weeks

Kadafi's briefing flags the RDX Works court hearing on 18 November as the next milestone.

NEW

Permanent RAC vote happens in November

projectShift confirmed the vote needs only a few days of candidate checks and formalities.

WORTH A CLICK

New community price service

prices.radixdao.org

Fixes blank Wallet prices; set it under Preferences 'Token Price Services.

Wiki: November pool drain

radix.wiki/contents/history/dex-pool-drain-november-2026

Full write-up of the exploited rounding flaw.

Radix skills for AI agents

github.com/xstelea/radix-skills

Lowers the barrier to building Scrypto dApps with AI.

JARGON, DECODED

Majority Judgement — A voting method where you rate every candidate as qualified or not; a ballot that skips anyone becomes null, so winners need both votes and perceived fitness.

Blueprint — A ready-made on-ledger component that dApps build on — like the pool code at the centre of this week's flaw.

exrd — A wrapped version of XRD that lives on Ethereum, letting people buy on Ethereum and bridge over to Radix.
