RADIX DLT · THE COMMUNITY CHAT, DISTILLED

Radix Weekly

What the room was really talking about

WEEK #28
16–22 Nov 2026
t.me/radix_dlt

COMMUNITY MOOD · DAY BY DAY — 5/10 · same as last week

Previously: the DAO was founded and Gary closed the OTC deal, volunteers rescued the Wallet's price service, and Jelthebest found a rounding flaw in the Engine's core pool blueprints.

A busy, housekeeping-heavy week: the permanent RAC election machinery sputtered to life (complete with a voting-site bug), an urgent Android wallet security update landed with credit to a community researcher, and newcomers got a crash course in the fiddly art of actually buying XRD. Beneath the noise, the community kept quietly fixing things — listings, bots, bridges and all.

MESSAGES / DAY  peak 208/day · most active: Danner Fall, Kadafi

WHAT THE ROOM TALKED ABOUT

Where are the promised DAO assets?

Dustin Henderson pressed on whether the Foundation assets promised to the DAO have actually been transferred, arguing a month-plus after DAO formation is long enough. foxylady and Mr. Peanutbutter insisted the transfer was always planned for after the DAO is fully established and the final vote.

driven by Dustin Henderson, foxylady, Mr. Peanutbutter

Urgent Android wallet security update

Radix Wallet for Android 1.22.3 fixes a vulnerability affecting locally stored seed phrases in versions 1.18.7–1.22.2. Simply installing the update isn't enough — affected users must complete an in-wallet protection step. LRB85 was credited with responsibly reporting it.

driven by LRB85, Ghenadie

PRAC election kicks off, with hiccups

projectShift announced a TRAC update activating the PRAC election time-constraint, and a DAO vote went live approving the 14 candidates on the ballot. A duplicate election entry on vote.radixdao.org caused brief confusion before Daffy (aka Heimdallr) fixed it — the correct vote is the Permanent RAC Election.

driven by projectShift, Daffy (aka Heimdallr), captain

THE BOTTOM LINE

REMEMBER THIS

The permanent RAC election is officially in motion — a ballot-approval vote is live for 14 candidates, and the seven seats are decided in the very next vote.

NEXT WEEK

Watch for: the 7-seat election vote following the ballot approval, the Foundation's asset transfer to the DAO once the final vote passes, and Gate resuming XRD deposits on 30 November.

More from the room

The week had more conversations than one page could hold.

THE CONVERSATIONS, CONTINUED

Should price talk be silenced?

Markus proposed reinstating a no-price-talk rule, saying price chatter drowns out everything else. lex, Ward $WOWO and Kadafi pushed back for minimal moderation, arguing it's no more off-topic than other chatter. Markus won't enforce anything without community consensus.

driven by Markus, lex, Ward $WOWO

The tricky art of buying XRD

With direct fiat routes offline, members spent the week helping Killieboy and others piece together routes: buy eXRD on Ethereum or Base, bridge via Hyperlane or Astrolescent, or swap SUI to USDC first. Jelthebest and Sebööol became the room's unofficial onboarding travel agents.

driven by Killieboy, Jelthebest, Sebööol

Fixing the chat itself

Mr. Peanutbutter proposed reviving a bot requiring a Radix wallet before posting; lex offered to build one, while Jonas | Delphibets.com warned it would lock out genuine newcomers. Blind5ight separately called for a webpage coordinating what needs doing, milestones and ecosystem needs.

driven by Mr. Peanutbutter, lex, Blind5ight (Watch out for scammers)

ALSO THIS WEEK

- Kadafi confirmed he has downloaded the entire main chat history since the channel began, and Vlad B suggested uploading it somewhere safe.
- LINUXX.xrd launched a new community validator whose proceeds will fund development on Radix.
- foxylady and Mr. Peanutbutter began an effort to update Radix's outdated network info on CoinMarketCap and CoinGecko.
- BassPhil and RoterHund flagged an ECB search for partners to test tokenized bank deposits — with an ECB contact reportedly 'all ears'.
- Markus floated that a wrapped XRD token on Base or Solana could be a route to tier-1 exchange listings.
- Danner Fall and Mr. Peanutbutter mapped out what a Kraken listing would require — heavy legal paperwork, with a possible workaround via Binance.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

COUNCIL & INSIDER WATCH

projectShift published a TRAC update activating the PRAC election time-constraint and urged members to read it and vote, while also calmly shutting down speculation about GlowFound (100% owned by RDXH shareholders, not the community's business). Daffy (aka Heimdallr) quickly fixed the duplicate election entry on vote.radixdao.org.

projectShift RAC

Announced the TRAC update activating the PRAC election time-constraint, and clarified GlowFound's ownership is public record on Companies House.

"bro, all info is free in Companies House, you're being hustled"

Daffy (aka Heimdallr) RAC

Confirmed the duplicate election entry on vote.radixdao.org was a bug and fixed it the same morning.

LRB85 COMMUNITY RESEARCHER

Responsibly reported the Android seed phrase vulnerability fixed in wallet 1.22.3, and shipped test builds adding iroh as a wallet-to-dApp connection option.

Vlad B • ideomaker.com • foton.is • radi BUILDER

Announced an intent-based DEX where assets stay in your wallet until settlement with zero fees until then, and said Foton is close to launching on Stokenet.

"I can build honestly apps like this all day, but I need to pay rent with something. Hope it pays at some point all this grinding."

Blind5ight (Watch out for scammers) COMMUNITY MEMBER

Called for a webpage listing what needs doing, milestones and ecosystem needs, and asked the room to picture an agent-focused future and the tech steps needed for it.

Markus COMMUNITY MEMBER

Proposed a no-price-talk rule for the chat, confirmed the Foundation replaced Dan's Telegram owner account with one destined for the DAO, and urged macro-level coordination of efforts.

"Everyone can work on whatever they think is useful, but we should coordinate our efforts overall to get the most out of it (micro vs macro)"

QUESTION OF THE WEEK

"Why am I not getting the 'update protection' prompt after updating to wallet 1.22.3?"

No prompt means you aren't affected; before proceeding with 'Update protection', make sure your seed phrase is written down.

ASKED BY FOXYLADY · ANSWERED BY GHENADIE

DEBATE OF THE WEEK — ALLOW PRICE TALK IN MAIN?

ONE SIDE

Price chatter drowns out the real conversations, so the no-price-talk rule should return to keep the room useful.

THE OTHER

Minimal moderation is healthier — price talk is legitimate and no more off-topic than other chatter, and heavy rules push people away.

open — Markus won't enforce anything until the community reaches consensus.

Around the ecosystem

What shipped and launched, and the week's best lines.

FROM THE NEWS ROOM

Android wallet security update

Wallet 1.22.3 fixes a seed phrase vulnerability in versions 1.18.7–1.22.2; affected users must update via Google Play and complete the in-wallet protection step.

Radix Connect over iroh test builds

LRB85 released community test builds of the Android wallet and Chrome connector using iroh — faster wallet detection and no signaling-server dependence. Fresh wallet and Stokenet only.
github.com/genkipool/radix-connect-iroh/blob/main/docs/TESTERS.md

DAO vote on election ballot

A vote went live to approve the 14 candidates who will appear on the ballot, with the 7-seat election to follow in the next vote.
vote.radixdao.org/tc/4

rly.fun relaunches

lex relaunched rly.fun at rlyfun.com with bug fixes, faster loading, repaired images and an improved leaderboard.
rlyfun.com/DAO

FROM THE DEV ROOM

LRB85's community test builds pair the Android wallet and a Chrome connector extension over iroh as an alternative to WebRTC — faster detection of a closed wallet, self-recovering requests and no dependence on a signaling server. Testers must use a fresh wallet on Stokenet, never a main seed phrase.

HEARD IN THE ROOM

> *"Never doubt that a small group of thoughtful, committed, citizens can change the world. Indeed, it is the only thing that ever has."*
>
> — MJGTZU

> *"Spoke to an ECB person I know working on their wholesale DLT track last night, they are all ears for any scalable solutions."*
>
> — ROTERHUND

> *"there is no other crypto experience which is as seamless and familiar to non crypto people as using radix wallet · If you can do internet banking you can use radix for crypto"*
>
> — ORANGECAT.XRD

> *"We should share all these valuable resources to be more resilient, and save time when we need them."*
>
> — VLAD B • IDEOMAKER.COM • FOTON.IS • RADI

THE PULSE

The mood: Steady and constructive — the community is busy fixing its own plumbing while waiting for the election to finally get going, with only mild impatience about the pace of DAO asset transfers.

Written by AI from the public community Telegram chat — may contain mistakes. Never financial advice.

KEEPING SCORE

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

PENDING **Permanent RAC vote happens in November**
The ballot-approval vote is live; the 7-seat election follows in the next vote.

PENDING **RDXW liquidation details in two weeks**
No new details surfaced this week.

NEW **Seven-seat RAC election follows ballot vote**

NEW **Foton launches on Stokenet soon**
Per Vlad B, it's close to launching.

WORTH A CLICK

Permanent RAC Election vote
vote.radixdao.org/tc/4

The correct governance vote after the duplicate-entry confusion.

TRAC update on PRAC election
t.me/RadixAccountabilityCouncil/1213

projectShift's post activating the election time-constraint.

UK Companies House search
find-and-update.company-information.service.gov.uk/

Look up company records for free — don't pay resellers.

JARGON, DECODED

iroh — A connection technology used as an alternative way to link your Radix Wallet to dApps, without relying on a central signaling server.

PRAC — The Permanent Radix Accountability Council — the successor body to the interim RAC, elected by the community.

Intent-based DEX — An exchange design where your assets stay in your wallet until a trade fully settles, rather than being deposited up front.

Companies House — The official UK registry where company ownership and records are published free of charge.
