Radix DAO Weekly

The week in governance, without the scroll-back

WEEK 22 · 25 MAY 2026
25–31 May 2026
Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY — 6/10 · +1 vs last week

Previously: the Xi'an funding debate over procurement process continued, and forum proposals on dApp funding, ZK privacy and Gateway maintenance circulated.

A governance-heavy week: the council confirmed Peachy is stepping away and no longer blocks the DAO LLC's KYC, the Foundation's maintenance mode left the wallet without any process for new changes, and a senior wallet developer worked his last full-time days. Hyperscale's milestone 1 grant was confirmed paid, and a heated debate erupted over rebranding the project.

WHAT THE ROOM TALKED ABOUT

Peachy steps away from council

After weeks of silence, Peachy clarified his position to the council and is effectively stepping away. projectShift said this removes the KYC blocker for forming the DAO LLC, and the council used its available counsel to decide how to proceed during his absence.

driven by projectShift, PeachyKeehn

Wallet handover in maintenance mode

Ghenadie confirmed the Foundation has been in maintenance mode since May 1 with no process for accepting new wallet changes until IP transfers to a community entity; May 31 was his last full-time day. Phil Gibson volunteered to temporarily maintain the mobile repo alongside Ghenadie_XRD.

driven by Ghenadie, Phil Gibson, Stoigo

Hyperscale milestone 1 paid

@Andy.XRD confirmed flightofthefox has received milestone 1 of his Foundation grant in full, with work reportedly ahead of schedule. flightofthefox reassured the room the project is on solid ground.

Should Radix rebrand?

An anonymous member pushed for a new name to escape brand dilution and SEO problems. Opponents countered that rebranding is expensive, the market won't be fooled, and the Foundation's terms reportedly tie funds to the Radix name — most agreed it should wait until the DAO is settled.

driven by Blablabla, Daffy, Adam

THE BOTTOM LINE

REMEMBER THIS

Peachy's departure unblocked KYC for the DAO LLC — but the wallet's lead developer left the same week with no process in place to accept new changes.

NEXT WEEK

Watch for: whether Phil Gibson's temporary maintenance role is formalised, and whether the council's next DAO structuring update moves the LLC formation forward.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

COUNCIL & INSIDER WATCH

The council published three updates: a Stokenet note, a DAO structuring update, and confirmation that Peachy has clarified his position, is stepping away, and no longer blocks KYC for the DAO LLC. avaunt pointed wallet bug reports to the project's GitHub issues repo.

projectShift TRANSITION RAC

Confirmed Peachy's clarification ends his blocker on KYC for the DAO LLC, and argued that microtransactions are the literal foundation of a machine economy.

"I'm just glad (for all of us) that he did finally respond and clarified things."

Ghenadie RADIX WALLET DEVELOPER

Said the Foundation has had no process for new wallet changes since May 1, that May 31 was his last full-time day, and that MFA could ship in roughly two months with two full-time devs.

flightofthefox HYPERSCALE DEV

Confirmed milestone 1 work is ahead of schedule, answered scaling questions on native vs bridged assets, and argued a rebrand should wait until the project has real traction.

"No pressure. I wouldn't proposition the community if I had any doubts."

avaunt TRANSITION RAC

Confirmed the Radix wallet code is open source (with a Sargon build caveat for external contributors) and directed wallet bug reports to the GitHub issues repo.

QUESTION OF THE WEEK

"Why is the council getting legal advice about Peachy if the DAO LLC isn't formed yet?"

projectShift explained the council just used available counsel to ask how to move forward given Peachy's absence, because future members must be KYC'd and identified to form the DAO LLC.

ASKED BY JELTHEBEST · ANSWERED BY PROJECTSHIFT

DEBATE OF THE WEEK — REBRAND NOW OR AFTER THE DAO SETTLES

ONE SIDE

A unique new name would fix brand dilution, bad chart optics and SEO issues, and fits naturally with the community takeover and Hyperscale launch.

THE OTHER

Rebranding is enormous, costly work the market won't be fooled by; the Foundation's terms reportedly tie the funds to the Radix name, so it should wait at least 12 months until the DAO is established.

Still open — expect a rematch.

Around the ecosystem

What shipped and launched, and the week's best lines.

HEARD IN THE ROOM

> *“Machines don't need us, our requirements, rules or limitations.”*
>
> — PROJECTSHIFT

> *“There's just no option to not build it though. Right, you build it and it might fail, but there's no 'don't build it and they'll come'.”*
>
> — BAYESIEN

> *“It's a gamble for sure, but with a small bet and enjoying the journey along the way, it's a worthwhile shot.”*
>
> — IAN

THE PULSE

The mood: Restless but constructive: relief that Peachy’s situation resolved, pride in Hyperscale’s progress, and unease about the wallet’s leaderless maintenance mode and a heated rebrand argument.

KEEPING SCORE

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

NEW **Rebrand discussion at least 12 months away**
Daffy suggested serious discussion only after the fund transfer and DAO are settled.

NEW **Phil Gibson's temp maintainer role formalised**
He volunteered pending a more permanent proposal.

NEW **MFA could ship in roughly two months**
Ghenadie's estimate, conditional on two full-time devs and known financing.

PENDING **Next Xi'an milestone open to competing bids**

Where true dApp development costs were aired.

JARGON, DECODED

KYC — Know Your Customer — the identity checks required before someone can be a legal member of the DAO LLC.

Maintenance mode — The Foundation's reduced state since May 1: it keeps the network running but has no process for accepting new changes to projects like the wallet.

MFA — Multi-factor authentication for the Radix Wallet — extra layers of protection beyond a single passcode.
