Radix DAO Weekly

The week in governance, without the scroll-back

WEEK 27 · 29 JUN 2026
29 Jun – 5 Jul 2026
Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY — 5/10 · same as last week

Previously: the Transition RAC came under pressure from Phil Gibson over transparency, projectShift pledged named bylines, and the community debated who funds Radix's next chapter.

A quieter governance week on the forum, with the main conversation running in Telegram. A visitor pitched his on-chain voting protocol, the council-multisig model came under sustained challenge, Daffy published plain-English reading guides for the draft DAO charter, and the community absorbed Dan Hughes's posthumous Cassandra paper.

WHAT THE ROOM TALKED ABOUT

On-chain voting protocol pitched

Nicolai (Sentura) pitched muanprotocol.com as a voting tool for the Radix DAO. Pushback focused on its deposit requirement, closed-source risk and the chicken-and-egg problem of no active DAOs on Radix yet.

driven by Nicolai, flightofthefox, Timan

RAC multisig centralization challenged

Nicolai argued a 5-of-7 KYC'd signer council holding the treasury, with security resting only on legal enforcement, is antithetical to crypto. Others defended it as a sensible transitional model.

driven by Nicolai, Mr. Peanutbutter, flightofthefox

DAO charter reading guides published

Daffy published plain-English reading guides for the proposed DAO charter and the policy library on the Shadaffy governance repo, making the draft documents readable for newcomers.

driven by Daffy, Dezza

Who funds the wallet's future

A forum thread asked how a native wallet app would handle certificate signing and who would own getting it into app stores. stallion suggested, half-jokingly, that the RAC fund future wallet development themselves.

THE BOTTOM LINE

REMEMBER THIS

The KYC'd council-multisig model drew its strongest challenge yet, while Daffy's reading guides finally made the draft DAO charter readable for ordinary community members.

NEXT WEEK

Watch for: the Operating Agreement landing, the Permanent RAC nomination thread opening, and movement on the expiring market-maker contract.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

COUNCIL & INSIDER WATCH

No council activity was visible in the RAC room this week; the community is still waiting on the Operating Agreement and the Permanent RAC nomination thread, with projectShift carrying most of the public-facing council voice in the main chat.

flightofthefox HYPERSCALE DEV

Said deposits would kill voter turnout and snapshots are already verifiable; defended the transitional multisig as safer than autonomous on-chain treasury voting for now, and noted the DAO has no say over the network itself.

"For the love of god man... stop posting diatribes in TG, and just set yourself to work if you care for Radix. The community will support anyone who puts shoulder to plow and get results."

projectShift TRANSITION RAC

Walked the community through Dan Hughes's posthumous Cassandra paper, describing it as an automated-fork mechanism with delayed finality that external systems like exchanges and bridges couldn't trust, and one puzzle piece in a larger vision Dan was assembling.

Mr. Peanutbutter TRANSITION RAC

Defended the KYC'd signer council as a sensible transitional model and explained KYC data stays confidential, with identities visible only for members who choose to be public representatives.

"Democracy is the worst form of government, except for all the others."

Daffy COMMUNITY CONTRIBUTOR

Published plain-English reading guides for the proposed DAO charter and policy library, and shared a draft ERC-8004-style agentic protocol doc asking whether its primitives should be DAO-owned and built openly.

QUESTION OF THE WEEK

"Will the KYC data of RAC members be made public?"

No — KYC info stays confidential because it is required to sign transactions; only members who choose to be public-facing representatives will have visible identities.

ASKED BY MARKUS · ANSWERED BY MR. PEANUTBUTTER

DEBATE OF THE WEEK — IS THE RAC MULTISIG MODEL TRULY DECENTRALIZED?

ONE SIDE

A KYC'd 5-of-7 signer council holding keys and treasury, with security resting only on legal enforcement, is antithetical to crypto and not a real DAO.

THE OTHER

It is a sensible transitional step: on-chain autonomous voting doesn't stop whales taking the treasury, validators can fork to recover stolen funds, and holders can vote the council out.

Still open — expect a rematch.

Around the ecosystem

What shipped and launched, and the week's best lines.

HEARD IN THE ROOM

> *"Democracy is the worst form of government, except for all the others."*
>
> — MR. PEANUTBUTTER

> *"Crypto always trades complexity for decentralization."*
>
> — NICOLAI

THE PULSE

The mood: Engaged but tense — the community argued hard over centralisation in the council model while the DAO's founding documents stayed behind schedule.

KEEPING SCORE

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

PENDING **Market-maker contracts expire before the DAO is ready**
flightofthox flagged roughly two months left, and repeated this week that the DAO setup is time-sensitive.

NEW **Permanent RAC has seven seats**
Raised again in Tuesday's discussion of the multisig model.

NEW **muanprotocol revisited in 6–9 months**
Daffy suggested the discussion gets easier once more of the community has seen the tooling.

PENDING **Permanent RAC candidate shortage at activation**

WORTH A CLICK

DAO charter reading guide
github.com/Shadaffy/radix-dao-governance/blob/master/pending/constitut

Daffy's plain-English guide to the draft DAO charter.

DAO policy library guide
github.com/Shadaffy/radix-dao-governance/blob/master/pending/policy-li

Companion reading guide for the draft policy library.

JARGON, DECODED

Multisig — A wallet or treasury that requires several named people to sign together before funds can move.

Snapshot — A point-in-time record of token balances used to measure who can vote, without voters locking up their tokens.
