Radix DAO Weekly

The week in governance, without the scroll-back

WEEK 38 · 14 SEPT 2026
14–20 Sept 2026
Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY — 4/10 · same as last week

Previously: the council staged the Eagle-Ray validator restart after the 31 August exploit, liveness returned, and a compensation debate for exploit victims began without a formal proposal.

Governance moved fast this week: the Transition RAC closed the Charter & Policies discussion phase, and the Temperature Check on Terms of Cooperation ratification went live as DAO formation rolled into MIDAO's hands. Forum review work produced real fixes before the vote, while the main chat argued strategy — a funded restart around Hyperscale versus incremental integration — and vented anger at the official incident report.

WHAT THE ROOM TALKED ABOUT

Charter & Policies ratification

The Transition RAC ended the 18-day Charter & Policies discussion phase at 23:59 UTC on 18 September and moved the framework toward Temperature Check and Ratification. projectShift stressed the original window was only extended because of the network outage. The TC for Ratification vote is now open.

driven by projectShift, Daffy, linuxx

Community policy review fixes

Stok Dokulus posted a layman's review of the policy library; Daffy adopted three of his points into the repo before the vote, including removing a delegate veto over emergency Charter amendments and raising the short Temperature Check floor from 1 day to at least 2 days for election runoffs.

driven by Stok Dokulus, Daffy

Two-stage election default debate

Seböööl argued Majority Judgment lets a coordinated bloc sweep every RAC or Treasury Signer seat in one ballot, so those bodies need a two-stage default. Daffy replied Grade Quantile settings already match the two-stage threshold and that Treasury Signers are allocated from seated RAC members anyway.

THE BOTTOM LINE

REMEMBER THIS

The Charter & Policies framework moved to a live Temperature Check, with DAO formation now in MIDAO's hands — the community's first binding-track vote on its own constitution.

NEXT WEEK

Watch for: the TC for Ratification result, whether FoShinto's conduct proposal returns in revised form, and any formalised plan around Hyperscale integration.

More from the room

The week had more conversations than one page could hold.

THE CONVERSATIONS, CONTINUED

Zero-tolerance conduct proposal

FoShinto proposed a community vote on adopting zero-tolerance for bigotry and abuse, claiming the new Code of Conduct is weaker than the removed Charter section 11 on hate speech. projectShift said the post was too personal and single-issue, warning that zero-tolerance votes on any one subject set a dangerous pattern.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

COUNCIL & INSIDER WATCH

The Transition RAC closed the Charter & Policies discussion phase, moved the framework toward Temperature Check and Ratification, and shared its weekly community update. DAO formation is now in MIDAO's hands, with the TC for Ratification vote live.

projectShift TRANSITION RAC

Announced DAO formation is rolling in MIDAO's hands and the TC for Ratification vote is live; closed the Charter discussion phase and rejected FoShinto's zero-tolerance proposal as too personal.

Daffy

Adopted three fixes from Stok Dokulus's review before the vote, including raising the short Temperature Check floor to at least 2 days, and defended the election method settings against Sebööol's two-stage proposal.

"Thank you — this is the most useful comment we've had, and your arithmetic is right. One part of it is our fault. The guide needs an update."

Sebööol RAC CANDIDATE

Reviewed the Charter for entrenchment routes and found them closed; argued RAC and Treasury Signer elections should default to two stages to resist a bloc sweep.

linuxx RAC CANDIDATE

Voiced anger after reading the official incident report, criticising RDX Works, Piers and partners, while still committing to vote on the DAO proposal out of respect for the community effort behind it.

"i currently vote, What we can do . Only vote that thing because a lot of ppl here put a lot of work on it."

QUESTION OF THE WEEK

"Isn't a 1-day minimum Temperature Check too short for voters across timezones?"

Daffy initially defended the floor, then conceded Stok Dokulus's point: the floor is now at least 2 days, applying to election Temperature Checks, approval polls and runoffs alike.

ASKED BY STOK DOKULUS · ANSWERED BY DAFFY

DEBATE OF THE WEEK — TWO-STAGE ELECTIONS FOR RAC SEATS

ONE SIDE

Majority Judgment lets a coordinated bloc sweep every oversight or money-holding seat in one ballot, so RAC and Treasury Signer elections should be two-stage by default.

THE OTHER

Grade Quantile settings already raise Majority Judgment's passing bar to the same share of turnout, Treasury Signers ride on RAC seats anyway, and a founding election needs speed.

Still open — expect a rematch.

Around the ecosystem

What shipped and launched, and the week's best lines.

HEARD IN THE ROOM

> *“I would probably have asked for an extension if the hack hadn't happened. The 18-day deadline was still tight for me because I have a bunch of other high priority stuff going on currently but that isn”*
>
> — STOK DOKULUS

> *“Radix with a community is best placed to make use of hyperscale. So the key thing is to have everything else worked up and nearly ready for when foxy gets close to completion”*
>
> — OG WORLD

THE PULSE

The mood: Constructive and detail-focused on the forum as the framework went to a vote, but tempered in the main chat by anger at the incident report and an unresolved strategic fight over Radix’s future direction.

KEEPING SCORE

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

CAME TRUE

Ratification voting proceeds after changes

The Charter & Policies discussion phase closed 18 Sept and the TC for Ratification vote is now live.

CAME TRUE

Official post-mortem report after liveness restored

The official incident report on the 31 August vault-authorisation vulnerability was published 17 Sept.

PENDING

DAO launches in around a month

DAO formation is rolling in MIDAO's hands with the ratification TC now open.

NEW

Permanent RAC election waits on Charter ratification

Forum review concluded the election can only follow the Charter's ratification.

WORTH A CLICK

TC Ratification vote

Public incident report

www.radixdlt.com/blog/public-incident-report-vault-authorisation-vulne

Official post-mortem on the 31 August vault-authorisation vulnerability.

JARGON, DECODED

Two-stage election — An election run in two rounds — a nomination or filtering round followed by a deciding round — so no single ballot can fill every seat at once.

Detached signing — Signing a document offline with a strong digital certificate so the signature proves who approved it, not just that the text wasn't altered.

Treasury Signer — A role with authority over the DAO treasury's funds, allocated from seated council members.
