RADIX ECOSYSTEM · THE COMMUNITY, DISTILLED

Radix Ecosystem Weekly

What the room was really talking about

WEEK 28 · 6 JUL 2026
6–12 Jul 2026
Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY

5/10 · same as last week

Previously: validators were squeezed, Hyperscale's docs went public, and the community stablecoin idea floated.

A week of contrasts: builders shipped — an idOS PoP portal, a Rust SDK, a Signetix multisig launch, and the first x402-Radix code — while 3 million XRD sat stuck in Root Finance and an exchange quietly shut its doors. Underneath it all, the chat kept circling one question: who will actually step up and do the work?

WHAT THE ROOM TALKED ABOUT

Root Finance: 3M XRD stuck

Eddie reported roughly 3M XRD trapped in Root Finance, with withdrawal and repayment both broken. flightofthefox clarified it's a bad-debt problem, not a frontend bug, and questioned the Foundation's decision to keep honouring the grant even after announcing it would wind down.

driven by Eddie, flightofthefox, Vlad B

Radix joins x402 protocol list

avaunt asked who's adding Radix to the x402 Foundation's protocol list; xStelea had already started, with a first commit and a plan: review the specs, watch for upstream drift, and use Fable 5 for checks. He invited contributors or forks.

driven by avaunt, xStelea

Who steps up for Radix?

A recurring thread all week: with the Foundation stepping back, members put forward concrete self-help proposals — Phil Gibson offered six months of stewardship for the iOS and Android Radix Wallet apps, and Giles Morris proposed a 3-month, 3M XRD contract covering the Foundation's transition tasks.

driven by Phil Gibson, Giles Morris, Daffy

BONK exploit: could it happen here?

Vlad B shared the tale of a Bonk DAO proposal passing unnoticed, letting one voter transfer 20M tokens to himself. projectShift reassured the room it can't happen on Radix unless the community itself votes in the changes that allow it.

THE BOTTOM LINE

REMEMBER THIS

Roughly 3M XRD is stuck in Root Finance and recovery is unresolved — the sharpest reminder yet of what unmaintained dApps cost users.

NEXT WEEK

Watch for: x402-Radix integration progress, responses to the wallet stewardship and Giles Morris proposals, and any news on Root Finance recovery.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

QUESTION OF THE WEEK

“Has anyone started adding Radix to the x402 Foundation protocol list?”

Yes — xStelea confirmed work is underway: review the specs, check for drift with upstream, use Fable 5 to verify logic, and he’s happy to add contributors or accept forks.

ASKED BY AVAUNT · ANSWERED BY XSTELEA

DEBATE OF THE WEEK — WHO OWNS RADIX TELEGRAM MODERATION

ONE SIDE

Dezza: the Permanent RAC should set moderation rules and appoint mods, so candidates are protected from the abuse that burned out contributors like Timan.

THE OTHER

Bayesien: keep the council’s surface area minimal and let community mods run a strong abuse policy independently — wary of concentrating power in a future trillion-dollar DAO.

Still open — expect a rematch.

Around the ecosystem

What shipped and launched, and the week's best lines.

FROM THE NEWS ROOM

Signetix launches on mainnet

Signetix.app (by Rad Bull X) is live: a multisig approvals service for teams, DAOs and AI agents, with native key support and a fixed 3 XRD fee per execution.

signetix.app

OTER relaunches idOS PoP portal

After the RDX Works-hosted issuer retired, OTER deployed its own issuer for the idOS Proof-of-Personhood portal, with Radix-native wallet login.

idos.oter.io

GENKIPOOL ships Rust SDK

A new Rust SDK for Radix DLT is on GitHub, with ownership offered to the official Radix org — plus an MCP integration pairing AI agents with the Radix mobile wallet.

github.com/genkipool/radixdlt-rust-sdk

AscendX appears to shut down

Vlad B warned that the AscendX exchange seems to have gone under — anyone holding XRD there should take note.

FROM THE DEV ROOM

xStelea's first x402-Radix integration commit landed, with a Fable 5 spec-drift review in motion — the week's main developer output was a contribution framework rather than new code.

HEARD IN THE ROOM

> *"Show users what they can do, don't tell."*
>
> — MORTEN

> *"The attacks were the main reason I burned out and became more and more private."*
>
> — TIMAN

> *"I believe that I could probably do everything Andy does - without knowing what it is he actually does"*
>
> — GILES MORRIS

THE PULSE

The mood: Builder energy is real — but Root Finance losses, a dead exchange and a lingering sense that people have checked out keep the mood sober.

KEEPING SCORE

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

PENDING **A solid stablecoin is needed for AI payments**
GENKIPOOL again argued a stablecoin is the missing piece versus x402.

NEW **iOS 27 / Android 17 may break wallet**
Phil Gibson warns September's releases need testing ahead of time.

NEW **Radix Wiki will run as a DAO**
Bayesien hinted the wiki will run on Caper governance once it goes live.

PENDING **Muan onboards its first projects soon**

JARGON, DECODED

Proof of Personhood — A way of proving you're a unique human — via a soulbound badge — so apps can treat you as one person, one identity.

Multisig — A shared account that needs several approved people (or agents) to sign before a transaction goes through.

MCP server — A standard way for AI assistants to connect to external tools and services.
