RADIX ECOSYSTEM · THE COMMUNITY, DISTILLED

Radix Ecosystem Weekly

What the room was really talking about

WEEK 29 · 13 JUL 2026
13–19 Jul 2026
Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY — 5/10 · same as last week

Previously: the wallet was running on Ghenadie_ex_rdx's spare time, the stablecoin hunt sharpened, and Root Finance's silence left 3M XRD stuck.

A hands-up kind of week: people proposed things, built things and argued about who should get paid for it. The wallet got a bug identified, a fix promised and a community NFT pull request, Reddit outreach surprised everyone with its reach, and the stablecoin picture grew a little clearer.

WHAT THE ROOM TALKED ABOUT

Who keeps the wallet alive?

Ghenadie_ex_rdx confirmed he still maintains the Radix Wallet in his spare time, including iOS 27 support, identified the Android unstaking bug as a known issue with a fix possibly this week, and proposed a simpler "MFA v0.5" using Advanced Accounts. Kafkafrate filed a pull request with NFT UI improvements for the Android wallet and offered to do the iOS...

driven by Ghenadie_ex_rdx, Kafkafrate, djtrebel

Stablecoin hunt: Open USD, RLUSD, native

jwxrd's research concluded Open USD is a real near-term opportunity via a partner application, while RLUSD needs Ripple approval and is a longer-term play. GarySky1 again hinted a quality native stablecoin is coming later this year, with liquidity already being arranged.

driven by jwxrd, GarySky1, Kafkafrate

Root Finance: 3M XRD stuck

Eddiemenezes reported 3M XRD stuck on Root Finance with broken withdrawals and no developer response — while a scammer impersonating a "ROOT Finance moderator" targeted him and was flagged as fake by projectShift and djtrebel. Kafkafrate noted the project received a large XRD grant that could have compensated affected users.

Grassroots marketing gains traction

GENKIPOOL's Reddit revival drew 3,800 views and 18 comments on one post — more traffic than X.com — and he argued even criticism helps publicity. sonotopia developed his AI marketing team concept, adding Reddit to its screening list, and juan_ill0 showed off a working Babylon browser-extension wallet soon to be open-sourced.

THE BOTTOM LINE

REMEMBER THIS

The community is quietly keeping Radix alive itself — wallet fixes, Reddit revivals and new wallets all came from volunteers this week.

NEXT WEEK

Watch for: the Android wallet unstaking fix, word on the Open USD partner application, and whether Root Finance ever responds.

Written by AI from the public community Telegram chat — may contain mistakes. Never financial advice.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

QUESTION OF THE WEEK

“Can governance vote to spend the treasury below a floor in the Caper system?”

No: there are two separate backings — XRD collateral inside the curve that governance cannot touch, and a treasury holding fees and investments that governance can spend to zero. The sell-back price is immune to any vote.

ASKED BY MICHAELTZU · ANSWERED BY BAYESIEN

DEBATE OF THE WEEK — XI’AN PRODUCTION TIMELINE

ONE SIDE

Xman: two years to production is excessive given AI-accelerated development, and the wait is frustrating.

THE OTHER

djtrebel: 18–24 months is fast for research-to-production work, which needs rigorous testing and an upgrade plan rather than a quick MVP.

Still open — expect a rematch.

FROM THE NEWS ROOM

Reddit revival drives traffic

A Radix thread on Reddit drew 3,800 views and 18 comments — more than X.com — sparking calls for consistent community content.

New Babylon browser wallet

juan_ill0 revealed a working browser-extension wallet for Babylon, with plans to open-source it soon.

Android wallet NFT UI PR

Kafkafrate filed a pull request adding NFT UI improvements to the Android wallet and offered an iOS version too.

github.com/radixdlt/babylon-wallet-android/pull/1445

Node runner fee rises

mrtrond raised their node fee to 10% to cover costs while reaffirming long-term commitment to Radix.

FROM THE DEV ROOM

Ghenadie_ex_rdx proposed "MFA v0.5": a simpler middle ground using Advanced Accounts in the Wallet, so users pick their own factors and an n-of-m rule without the full Access Controller overhead.

HEARD IN THE ROOM

> *"bringing a research network to production in 18 to 24 months is fast. It's not like a simple mobile app you can hack together and deploy an MVP and then iterate."*
>
> — DJTREBEL

> *"even if they're criticisms, they help us with publicity. We just have to prove them wrong."*
>
> — GENKIPOOL

> *"I like it when someone says "maybe we should" and then takes action!"*
>
> — DJTREBEL

THE PULSE

The mood: A can-do week of building and outreach, tempered by fractious spats over paid contributions and anxiety about who will carry the project forward.

Written by AI from the public community Telegram chat — may contain mistakes. Never financial advice.

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

PENDING — **Native stablecoin launches this year**
GarySky1 reaffirmed it is coming later this year, with liquidity being arranged.

PENDING — **Xi'an testnet mid-to-late 2027**
Chikinikin corrected himself: testnet Q3/Q4 2027, mainnet after that.

NEW — **juan_ill0's wallet open-sourced soon**
He said the Babylon browser-extension wallet works and will be open-sourced.

NEW — **Open USD launches later this year**
jwxrd concluded it is a real near-term opportunity for a Radix partner application.

The post behind this week's outreach surge.

JARGON, DECODED

Access Controller — The wallet component that lets one person secure an account with multiple recovery factors instead of a single seed phrase.

Advanced Accounts — On-ledger accounts that can hold assets directly and have configurable, multi-factor security rules.

Market maker — A party that continuously quotes buy and sell prices to keep trading liquid on an exchange.
