RADIX ECOSYSTEM · THE COMMUNITY, DISTILLED

Radix Ecosystem Weekly

What the room was really talking about

WEEK 31 · 27 JUL 2026
27 Jul – 2 Aug 2026
Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY — 6/10 · same as last week

Previously: the community readied tributes for Dan Hughes's first anniversary, and grassroots marketing kept growing despite platform censorship.

A bittersweet but productive week: the room marked one year since Dan Hughes's passing with warm memories, while flightofthefox stunned everyone by running eight full Hyperscale nodes inside a browser tab. Elsewhere, a homepage redesign brainstorm took shape on the forum and a returning member was safely walked back into the mobile wallet.

WHAT THE ROOM TALKED ABOUT

Hyperscale runs 8 nodes in a browser

flightofthefox compiled full Hyperscale nodes to WASM and ran eight of them across a multi-shard network in a single browser tab — real nodes, not a simulation. He confirmed genesis will start as one shard with Babylon as the root, and future shard splits will be governed by a configurable state-size threshold.

driven by flightofthefox, Vlad B, Anthony

Remembering Dan Hughes

The first anniversary of Dan's passing on 29 July drew quiet tributes. Timan shared a fond memory of Dan at a Barcelona conference slipping away from the crypto crowd for beers and a cheap döner with his Radix people; Jazzer marked the day with a sombre note.

driven by Seven, Timan, Jazzer

RDX Holding and Dan's estate

Timan explained that RDX still holds significant XRD in PrimeVault, represents Dan Hughes's estate (his inherited family), has fiat to cover running costs, and is developing new products conceived with Dan to promote Radix adoption without competing with ecosystem projects.

driven by Timan, foxylady

New Radix homepage brainstorm

foxylady posted a text mock-up of a redesigned Radix homepage — a deliberately minimal front page that opens up layer by layer, including a short hyperscale explainer — and invited designers to turn it into a concept the community can pick together. She also mused that slow adoption stems from bad timing, marketing and a speculation-driven market, which AI...

THE BOTTOM LINE

REMEMBER THIS

flightofthefox ran eight full Hyperscale nodes in a single browser tab — real nodes, with a single-shard genesis plan now confirmed.

NEXT WEEK

Watch for: designers responding to foxylady's homepage mock-up, and whether the Hyperscale demo spreads beyond Reddit censorship to a wider audience.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

QUESTION OF THE WEEK

“What will the initial shard and validator topology look like at Hyperscale launch?”

Genesis will be one shard with Babylon as the root; splits after that are governed by a configurable state-size threshold per shard, not a fixed validator count.

ASKED BY ANTHONY · ANSWERED BY FLIGHTOFTHEFOX

DEBATE OF THE WEEK — FOUNDATION RESOURCE MANAGEMENT

ONE SIDE

Mr. Popo argued the treasury is drained by strategic mismanagement and that flightofthefox needs a team of engineers rather than working alone.

THE OTHER

Gary countered that there is plenty in the treasury, and flightofthefox noted progress is going fine without a big team.

Still open — expect a rematch.

Around the ecosystem

What shipped and launched, and the week's best lines.

FROM THE NEWS ROOM

VIBOLTO launches on Radix

A new sports-betting platform went live on Radix, with more features planned and its VBT token trading via RSwap.
vibolto.com

Muanprotocol pauses for rebuild

Nicolai announced the mainnet frontend is paused until a new version with non-custodial snapshot voting launches; anyone who spent fees on a V1 vote NFT will be reimbursed.

Week in review blog

Bayesien shared the latest Radix week-in-review blog post covering community developments.

FROM THE DEV ROOM

flightofthefox's browser demo runs the actual full Hyperscale nodes compiled to WASM, just with in-memory networking and storage instead of disk and network I/O. Separately, Timan reported that GPT 5.6 can one-shot complex Scrypto code that passes expert review, helped by Scrypto being Rust-based…

HEARD IN THE ROOM

> *"My fondest memory of Dan is from the conference in Barcelona two years ago… once he found a moment he just wanted to have some beers and a cheap döner with his Radix people."*
>
> — TIMAN

> *"But if we make it, we'll have one hell of a story to tell our grandkids 😄"*
>
> — VLAD B

> *"honest answer probably mixture of bad timing, marketing and also a market that has been driven more by speculation then real need for the technology... with the dawn of AI that might change..."*
>
> — FOXYLADY

THE PULSE

The mood: Reflective and quietly hopeful — tender tributes to Dan mixed with genuine excitement about the Hyperscale demo, tempered by a sharp spat over Foundation resources.

Week in review blog

radix.wiki/blog/week-in-review-2026-08-02

Bayesien's summary of the week's community developments.

JARGON, DECODED

WASM — WebAssembly — a format that lets programs like full network nodes run inside a web browser.

CAIP — A chain-agnostic standard registry that gives every blockchain a common identity, making wallets and tools work across networks.

PrimeVault — An institutional multisig arrangement used to hold large XRD holdings securely.
