RADIX ECOSYSTEM · THE COMMUNITY, DISTILLED

Radix Ecosystem Weekly

What the room was really talking about

WEEK 38 · 14 SEPT 2026

14–20 Sept 2026

Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY

4/10 · same as last week

Previously: the network was back live after the Eagle-Ray fix, and a fierce compensation debate raged alongside hopes for an official exploit report.

A soul-searching week: the official incident report finally landed, the Hyperlane bridge and exchange access slowly came back toward life, and the room argued hard about what Radix's future should actually look like — incremental Hyperscale integration or a clean funded restart. A new betting dApp on stokenet and DAO formation news lifted the tail end of the week.

WHAT THE ROOM TALKED ABOUT

Funded restart vs gradual integration

Wim argued for abandoning the Xi'an roadmap and pivoting to a fully VC-funded restart built around Hyperscale, calling the salvage path a slow bleed. Others countered that no restart is real without hundreds of millions in confirmed funding, and that deciding this now is premature.

driven by Wim, James Sinkem, Vlad B

Does open source invite forks?

With Hyperscale open source, Vlad B asked why a big adopter like Cloudflare would use the Radix network or XRD rather than just forking the code — suggesting licensing or building enough apps and users to stay relevant. Others said he was worrying about monetization before the product even ships.

Post-exploit recovery grinds on

The Hyperlane bridge is still offline but Timan is coordinating its return, and once CEXs resume trading, RocketX cross-chain swaps should follow. Meanwhile Vlad B urged unstaking from the apparently abandoned Weft node; Timan called that premature and said the Weft team intends to continue.

Incident report: closure or anger?

The official report on the 31 August vault-authorisation bug was published, covering impact, containment and fixes. projectShift confirmed the network is safe and had no rollback, but linuxx read it with anger — and still voted for the DAO proposal out of respect for the community's work.

THE BOTTOM LINE

REMEMBER THIS

The long-promised official incident report is out, and the community is now arguing about what comes next rather than what went wrong.

NEXT WEEK

Watch for: the Hyperlane bridge and exchanges resuming, and whether the RocketX cross-chain path returns with them.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

QUESTION OF THE WEEK

“Is it safe to use and transfer XRD after the network restoration, and was there a rollback?”

Yes, it is safe(r), and no rollback happened.

ASKED BY NINA GELAVA · ANSWERED BY PROJECTSHIFT

DEBATE OF THE WEEK — SALVAGE RADIX OR RESTART AROUND HYPERSCALE?

ONE SIDE

Wim: the current path is a slow bleed — abandon the Xi’an roadmap and pivot to a fully VC-funded restart built around Hyperscale.

THE OTHER

James Sinkem and Sebööö̈l: integrate Hyperscale incrementally; a restart needs hundreds of millions in confirmed funding and voting on it now is premature.

Still open — expect a rematch.

Node runners: update seed nodes

Timan shared the official Docker and systemd docs for switching to the new community seed nodes — needed for nodes that won't sync post-transition.

docs.radixdlt.com/docs/node-setup-docker#get-the-docker-compose-script

FROM THE DEV ROOM

On whether Xi'an follows Dan Hughes's original design: Sir Drape Yird told the room there is no Xi'an development underway, and that flightofthefox's hyperscale-rs is the closest thing — though it does not follow Dan's original designs.

HEARD IN THE ROOM

> *"Hyperscale is open source. In the end we need no guidance. Ultimately all is there to find our own way."*
>
> — SEBÖÖÖL

> *"i feel like you see it the same way as with foton. looking too far into how to monetize before delivering a product. the best things start the other way around."*
>
> — LEX

> *"Tried to explain my avatar to my new team today 😂 purple 🪶 ? Wtf are you taking about. Radix culture is strong"*
>
> — TIMAN

THE PULSE

The mood: Restless and divided over strategy, but with real progress — an official report, a governance vote and a new dApp — softening the edges.

KEEPING SCORE

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

PENDING — **Native stablecoin launches this year**

PENDING — **Hyperscale testnet ready this year**
Wim separately suggested a restart could be feasible once Hyperscale completes testnet next year.

MISSED — **Xi'an testnet mid-to-late 2027**
Room consensus this week: there is no Xi'an development — hyperscale-rs is the closest thing.

NEW — **RocketX returns once CEXs resume**
Timan: once CEXs resume trading, RocketX cross-chain swaps should come back online.

WORTH A CLICK

Node setup docs (systemd)
docs.radixdlt.com/docs/node-setup-systemd#preparing-the-configuration-

Fixes nodes that won't sync — seed node update.

JARGON, DECODED

Parimutuel betting — Betting where all stakes go into a shared pool and winners split it, rather than betting against a bookmaker.

Multisig — A control setup where several independent keys must approve an action, so no single person can act alone.

Warp route — A specific connection on the Hyperlane bridge that moves a particular asset between two networks.
