RADIX ECOSYSTEM · THE COMMUNITY, DISTILLED

Radix Ecosystem Weekly

What the room was really talking about

WEEK 39 · 21 SEPT 2026

21–27 Sept 2026

Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY

5/10 · +1 vs last week

Previously: the room was watching the DAO formation Temperature Check and waiting on Hyperlane and the exchanges after the August exploit.

A tense, busy week: the fate of roughly 450k recovered hUSDC from the hack dominated the room, while the DAO's ratification vote quietly smashed through quorum with unanimous approval. In between, the community argued about open-source liability, built a governance portal, and watched other chains get hacked.

WHAT THE ROOM TALKED ABOUT

Who gets the recovered hUSDC?

Around 450k hUSDC can be recovered from the exploit, and the room fought all week over whether it returns to original holders (Option 1) or is shared pro-rata among all victims (Option 2). Hyperlane needs a clear community mandate before releasing anything, and its compliance requirements may limit what's even recoverable.

driven by foxylady, Ulfar, Faraz

Should open-source authors be liable?

After the hack, Radix Superfan questioned whether code bugs causing massive losses should carry zero liability. flightofthefox pushed back: automatic liability for all downstream uses would mean nobody ever does open source, and decentralized networks have no controlling party to sue anyway.

driven by flightofthefox, Radix Superfan

Cross-chain hacks hit home

The room tracked a major MultiversX exploit — 76M EGLD minted and large bridged sums accessed, later reportedly blocked before liquidation — and Vlad B suggested periodically running the latest security models against Radix's code, noting the same hackers hop from chain to chain. Lisk shutting down its L1 to become an Ethereum loyalty token added gallows…

Community builds its own tools

GENKIPOOL launched a working governance portal at radix-community.genkipool.com, with Timan converting the original Webflow site into a static site to cut costs; multi-account voting in a single transaction was added. Meanwhile lex flagged that the ecosystem dApp page lists dead projects, hurting visitor confidence.

THE BOTTOM LINE

REMEMBER THIS

The DAO ratification vote passed quorum with 100% approval — five days of voting still remain — while the community remains split on who deserves the recovered hUSDC.

NEXT WEEK

Watch for: the DAO Constitutional Proposal closing 2 Oct and the FND's refund consultation ending 4 Oct, which should set up the real vote on the hUSDC options.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

QUESTION OF THE WEEK

“Why does the voting app show 100% on the proposal card but 98% inside the proposal?”

The card shows quorum progress — 100% once the required 405.25M XRD voted — while the detail page shows the live for-vote percentage separately, which is why the numbers differ.

ASKED BY VLAD B · ANSWERED BY SIR DRAPE YIRD

DEBATE OF THE WEEK — RETURN OR REDISTRIBUTE RECOVERED HUSDC

ONE SIDE

Recovered property belongs to its original holders and must be returned to them outright; redistributing it amounts to theft.

THE OTHER

The hack damaged the whole ecosystem and everyone’s confidence, so recovered funds should be shared pro-rata among all victims.

open — the FND's consultation closes 4 Oct and the binding vote on the options comes after.

What shipped and launched, and the week's best lines.

FROM THE NEWS ROOM

Community governance portal live

GENKIPOOL's radix-community.genkipool.com portal lets anyone view and join DAO proposals, now with multi-account voting in one transaction.

radix-community.genkipool.com/en/governance

HEARD IN THE ROOM

> *"Someone steals all the safe deposit boxes from a bank… they return the boxes to their owners. They don't pour the contents out in a big pile and share them out among every customer"*
>
> — RADIX SUPERFAN

> *"If crypto was a gum-flapping competition Radix would have flipped Ethereum by now."*
>
> — JAMES SINKEM

> *"Let's keep going, quorum is a requirement, not the goal."*
>
> — PROJECTSHIFT

THE PULSE

The mood: Raw around the refund question but energized by the DAO milestone — quorum passed with unanimous approval and the mood lifted by Sunday.

Voting power explainer

vote.radixdao.org/about/voting-power

Lists every token type that counts for voting.

JARGON, DECODED

Quorum — The minimum number of votes a decision needs before it counts as valid — reaching it is a requirement, not the finish line.

ROLA — Radix's way of proving you control an on-chain identity to a dApp without making a transaction — Faraz's claim mechanism would use it.

Pro-rata — Sharing something out in proportion to each person's share — here, spreading recovered funds across all victims by their losses.
