RADIX ECOSYSTEM · THE COMMUNITY, DISTILLED

Radix Ecosystem Weekly

What the room was really talking about

WEEK 46 · 9 NOV 2026
9–15 Nov 2026
Telegram + RadixTalk

COMMUNITY MOOD · DAY BY DAY

5/10 · +1 vs last week

Previously: the room was waiting on the ex-RDX Works XRD row and Hyperlane's stuck collateral, with builders shipping and candidacy season warming up.

A rollercoaster week: the community's OTC deal finally landed, volunteers fixed the Wallet's broken price feed in 48 hours, and a fresh exploit exposed a rounding flaw sitting in the Radix Engine itself since Babylon. Between the highs and the headache, the takeover spirit was unmistakable.

WHAT THE ROOM TALKED ABOUT

Hyperscale abandoned? Confusion cleared up

GENKIPOOL worried Markus's 'good news' meant Hyperscale had been abandoned. flightofthefox settled it: his independent Rust build continues with weekly calls, and he'll help Radix migrate — but migration talk is months away while the tech stabilizes.

driven by GENKIPOOL, flightofthefox, Markus

OTC deal for ex-RDX XRD executed

Gary announced the OTC deal for RDX Works' XRD is final, with roughly 1.4 billion XRD received at a community-monitored address. The room celebrated avoiding more drastic measures, though Dave noted other addresses, including MEXC, still hold funds.

driven by Gary, WutruSan, Vlad B

Community fixes Wallet price service

After Sebööööl traced broken wallet prices to the defunct old token-price-service URL, volunteers built a lightweight replacement in under 48 hours, now live at prices.radixdao.org. Users must swap the URL manually under Wallet Preferences for now.

driven by linuxx, Sebööööl, Daffy

Native pool rounding flaw exploited

Jelthebest spotted suspicious transactions; the wiki confirmed a rounding flaw in the core TwoResourcePool and MultiResourcePool blueprints, exploitable mainly on high-value low-decimal assets like wBTC. It's been there since Babylon and needs an Engine patch — but the repository keys still sit with the Foundation.

driven by Jelthebest, Daffy, Bayesien

THE BOTTOM LINE

REMEMBER THIS

A rounding flaw in core pool blueprints since Babylon was exploited this week — and the DAO doesn't yet hold the keys to patch it.

NEXT WEEK

Watch for: who takes ownership of the Engine patch, and the RDX Works court hearing on 18 November.

More from the room

The week had more conversations than one page could hold.

THE CONVERSATIONS, CONTINUED

XRD supply cap not enforced

Bayesien found nothing in the protocol actually enforces the XRD supply cap, and the shortened emission period Dan Hughes discussed was never implemented. He expects both to be addressed for Xi'an.

driven by Bayesien, Vlad B

How should scarce DAO funds be spent?

The room argued over every hypothetical dollar: CEX presence versus dApp building, speculative marketing versus proven initiatives. Anthony pitched a low-cost pilot targeting Australian university guilds around February.

driven by GENKIPOOL, flightofthefox, Jelthebest

ALSO THIS WEEK

- Governance: the DAO LLC was officially founded with funds transferred, 15 candidates filed for the Permanent RAC, and the vote is set for November — see Radix DAO Weekly.
- Gary invited struggling validators to contact him and staked 25M XRD to Martin (Delphibets), who said node runners have paid costs out of pocket for over a year.
- linuxx warned that the Weft and Psilobox validators look inactive, and stakeholders should redeploy their stake.
- Bayesien offered to help run 'dapp in a day' workshops, citing nine he has already run in London.
- foxylady explained why foxy's Rust build differs from Dan's Java hyperscale prototype: Dan's tested feasibility, while foxy's includes strict testing and formal verification.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

QUESTION OF THE WEEK

“Does the Radix protocol actually enforce the XRD supply cap, and was the shortened emission period ever implemented?”

No — nothing in the protocol enforces the cap, and the shortened emission period discussed with Dan was never implemented; it’s expected to be addressed in Xi’an.

ASKED BY VLAD B · ANSWERED BY BAYESIEN

DEBATE OF THE WEEK — HOW SERIOUS IS THE BLUEPRINT FLAW?

ONE SIDE

flightofthefox and Azel: the flaw is economically marginal and avoidable — devs can simply stop using the component, which shouldn’t have been enshrined in the protocol anyway.

THE OTHER

Jelthebest and projectShift: it sits in core Radix Engine blueprints used by most DEXs, and confidence stays undermined until it’s patched and affected pools redeployed.

Still open — expect a rematch.

Around the ecosystem

What shipped and launched, and the week's best lines.

FROM THE NEWS ROOM

Wallet price service relaunched

Volunteers fixed the price feed used by the Radix Wallet in under 48 hours; it's now live at prices.radixdao.org.

prices.radixdao.org

Gate reopens XRD deposits

Gate will reopen XRD deposits on 30 November, per the official ecosystem announcement.

x.com/radixeco/status/2121516784696381883

OTC deal signed

Radix Weekly #26 reported the community signed the OTC deal for RDX Works' roughly one billion XRD.

FROM THE DEV ROOM

AI-assisted building had a moment: Vlad B says modern agents handle Scrypto well — 'Radix works like butter with agentic coding' — and members shared a Radix skills pack for AI agents plus GENKIPOOL's MCP server that lets agents draft wallet transactions.

HEARD IN THE ROOM

> *"This is great work chaps, fucking proud of you. And a great example of what it means "Community runs this now""*
>
> — PROJECTSHIFT

> *"no bags left to dump, DAO is about to start, we gonna be the first L1 thats really in communities hands"*
>
> — FOXYLADY

> *"Radix works like butter with agentic coding."*
>
> — VLAD B

> *"don't panic. brick by brick."*
>
> — FLIGHTOFTHEFOX

THE PULSE

The mood: Whiplash but net hopeful: the takeover felt real — funds landed, volunteers shipped fixes — even as a fresh Engine flaw reminded everyone how much maintenance lies ahead.

Written by AI from the public community Telegram chat — may contain mistakes. Never financial advice.

KEEPING SCORE

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

NEW **Gate reopens XRD deposits on 30 November**
Official announcement this week.

NEW **Supply cap enforcement will be fixed for Xi'an**
Bayesien's expectation after finding the cap unenforced.

NEW **Engine patch will come once keys change hands**
Daffy expects a patch and rebuild once someone with repository keys owns the fix.

PENDING **Hyperlane returns once hUSDC recovery completes**

WORTH A CLICK

Radix skills for AI agents
github.com/xstelea/radix-skills

Lowers the barrier for AI-assisted dApp building.

GENKIPOOL MCP server
radix-community.genkipool.com/en/console/mcp

Lets AI agents draft wallet transactions to sign.

Radix Week in Review
radix.wiki/blog/week-in-review-2026-11-15

The weekly community roundup for 15 November.

JARGON, DECODED

Blueprint — A ready-made, on-ledger component that dApps build on — here, the flawed pool blueprints baked into the Radix Engine itself.

exrd — A version of XRD that exists on the Ethereum network and can be bridged over to Radix.

Formal verification — Proving a program's logic mathematically, so bugs like rounding errors can't slip through — how flightofthefox tests his code.

MCP server — A tool that lets an AI coding agent connect to external software, here to prepare Radix wallet transactions for you to sign.
