

Radix Weekly

What the room was really talking about

COMMUNITY MOOD

7/10

A builder's week: a new on-chain DAO framework shipped, a community staking site got a full rewrite, and a free-to-play World Cup game launched in a single day. The AI-agent narrative keeps deepening, with two live demos and a Bittensor integration idea in the air, while a quieter identity debate resurfaces over who Radix is really for.

WHAT THE ROOM TALKED ABOUT

AI agents narrative grows teeth

Gary and LINUXX.xrd ran an 'Office of the Agents' Stokenet demo where AI agents act as employees of a Radix-native company, and Karl Tong floated a Bittensor subnet integration for cross-AI payments. The room is split between excitement about Radix as the settlement layer for autonomous organisations and real gripes about badge UX in the wallet.

driven by Gary, LINUXX.xrd, Karl Tong

Muan Protocol ships on mainnet

Nicolai launched Muan Protocol, a fully on-chain DAO framework where governance holds auth badges rather than wiring into every contract. Markus asked whether it could replace Consultation App V2, and Nicolai argued it's the only fully decentralised governance option the community currently has.

driven by Nicolai | Sentura, Markus

GENKIPOOL staking site rewritten

Validador GENKIPOOL shipped a major update to his community staking site, adding wallet connect, single-tx multi-validator staking, a shopping-cart mode and direct-to-owner staking. Nacho D and Adam praised the polish, and the link is already driving traffic from the main chat.

driven by Validador GENKIPOOL [GENKI], Nacho D, Adam

World Cup game lands in a day

Vlad B built and deployed a free-to-play World Cup prediction game on Radix in a single day using Codex AI, with sealed NFT match cards revealed after the tournament. He was already pushing a Standings page and live-match labels by Saturday, and Michael (RadixScan.io) fixed an NFT image bug the same hour it was reported.

THE BOTTOM LINE

REMEMBER THIS

Muan Protocol shipped on mainnet, giving the community a credible on-chain DAO framework to evaluate before the Permanent RAC and real DAO are even live.

NEXT WEEK

Watch for: the first wave of community feedback on Muan Protocol, and whether Vlad B ships his promised V2 of the World Cup game with 100+ artworks.

From the council & the crowd

What the tracked voices said, and the week's best exchanges.

COUNCIL & INSIDER WATCH

flightofthefox (hyperscale.rs) HYPERSCALE LEAD DEVELOPER

Confirmed Xi'an is 'very much underway' and pointed newcomers to the Hyperscale Telegram for progress. Pushed back hard on the Series LLC sub-DAO idea as overkill.

"Sub-DAOs sound overkill. Like the DAO version of Piers setting up 100 entities when they're actually just a little startup"

avaunt > Debix | Atomix | Bullring RAC

Checked the ShardSpace portfolio dashboard for SILVER and confirmed it was loading fine, suggesting a wallet-reconnect fix on SILVER's end.

Vlad B • ideomaker.com • foton.is • radi COMMUNITY BUILDER

Built and shipped the World Cup Badge Arena in a single day using Codex AI, then kept iterating on Standings and passport pages through the weekend. Also pushed back on the badge-creation flow as overwhelming.

"It's like opening pokemon playing cards packs · Nobody knows what they get until the end 😊"

Nicolai | Sentura MUAN PROTOCOL BUILDER

Launched Muan Protocol on mainnet and walked the room through how it differs from Consultation App V2 — fully on-chain, badge-based, and built for Radix's substate model.

QUESTION OF THE WEEK

"How does Muan compare to Consultation App V2 — could it become the future governance app for the DAO?"

Muan is fully on-chain with no off-chain resolver or snapshot dependency, uses Radix's asset-based substate aggregation for virtually unlimited voter scale, and could replace Consultation V2 if the community wants truly decentralised governance.

ASKED BY MARKUS · ANSWERED BY NICOLAI | SENTURA

DEBATE OF THE WEEK — WHO SHOULD RADIX ACTUALLY TARGET — INSTITUTIONS OR RETAIL?

ONE SIDE

Felix argued institutions won't come at current market cap and the site should pivot to plain-English retail messaging built around scale, safety and decentralisation.

THE OTHER

Validador GENKIPOOL and Adam said institutional focus is needed now because retail is inactive, and wallet, staking and games already serve everyday users.

Still open — expect a rematch.

Around the ecosystem

What shipped and launched, and the week's best lines.

FROM THE NEWS ROOM

Radix Wallet v1.22.1 released

The official wallet fix resolves custom-gateway selection and iOS total-balance display, shipped quietly with the help of community bug reports.

wallet.radixdlt.com

Muan Protocol goes live

Nicolai's Sentura team launched a fully on-chain DAO framework using Radix auth badges — positioned as a possible successor to Consultation App V2.

Ascent adds cosmetic shop

SILVER's game added a wallet-connected cosmetic shop where 70% of ASCENT paid is burned and 30% funds a reward pool.

ascent.xrd.workers.dev/

World Cup Badge Arena launches

Vlad B's free-to-play World Cup prediction game lets players collect sealed NFT match cards revealed after the tournament, deployed to mainnet in a day.

HEARD IN THE ROOM

"I don't think decentralization is primarily for humans. I think it becomes infrastructure for machines."

— GARY

"these is fast , better than any DLT company XDD"

— LINUX.XRD

"I always let my agents rip in yolo mode"

— XSTELEA.XRD

THE PULSE

The mood: A productive builder's week — Muan, the World Cup game and a retooled staking site all shipped, with the AI-agent narrative gaining real artefacts alongside an unresolved identity debate.

The tracker

What the room expects to happen — and how last week's calls went.

PREDICTION TRACKER

CAME TRUE

RadixPlanet validator fee rises to 40% on July 15

Reached 40% ahead of the predicted 15 July date, per last week's story.

PENDING

Caper.network sets trade-fee cap at 1%

No community update on the final cap this week.

NEW

Ascent Tier 2 unlock on Rly.fun with new layer

Announced as a next step after the current cosmetic shop launch.

NEW

World Cup Badge Arena V2 with 100+ artworks

Vlad B signalled a V2 swap from sealed cards to a larger revealed collection after the tournament.

WORTH A CLICK

GENKIPOOL community staking site

radix-community.genkipool.com

Wallet connect, multi-validator staking, shopping-cart mode for community stakers.

Hyperscale public overview docs

hyperscale.rs

Tracks the community Xi'an implementation progress from the Hyperscale team.

AI Ventures on-chain demo

ai-venture-radix.github.io

Live Stokenet demo of AI agents acting as company employees.

JARGON, DECODED

Founder badge — A Radix auth badge held by the deployer of a component, used to gate which actions the badge holder is allowed to take.

Series LLC — A US legal structure that lets one parent LLC spin off many cheap child entities, proposed for spawning Radix sub-DAOs.

Office of the Agents — A demo concept where AI agents act as on-chain employees of a Radix-native company, each with its own spending limits.
